## RECOMMENDATIONS

Do not double stack skids upon one another; racking recommended. Grade A pallets should be used with boards that have tight spacing to ensure proper box support. Stretch wrapping machine tension should be adjusted to ensure no deformation of the boxes. Hofmann recommends testing prior to full production.

## APPROVALS

Virgin materials are approved for food contact and meet FDA (Food and Drug Administration USA) and HPB (Health Protection Branch Canada) regulations.

Handling conditions vary from customer to customer. Tests are recommended throughout the process of denesting, filling, conveying palletization, warehousing, transportation and utilization by intermediaries and users. Specifications can change without notice. Please contact your Hofmann representative to confirm this data.
